AUTHOR	Van de Kamp, Jacqueline, Comp.
TITLE	Sudden Unexpected Death in Infants. (Supplement to Literature Search No. 71-14, April 1971 through June 1973).
INSTITUTION	National Library of Medicine (DHEW), Bethesda, Md.
SPONS AGENCY	National Institutes of Health (DHEW), Bethesda, Md.]
REPORT NO	NLM-Lit-Sear 73-17
PUB DATE	73
NOTE	7p.
EDRS PRICE	MF-$0.65 HC-$3.29
DESCRIPTORS	*Bibliographic Citations; *Bibliographies; Death; Foreign Language Periodicals; *Infant Mortality; *Library Collections; Medical Education; *Medicine
IDENTIFIERS	*National Library of Medicine

ABSTRACT

The National Library of Medicine (NLM) has prepared a selected computer-generated bibliography from recent international journals on sudden death in infants. Each of 108 citations is accompanied by descriptors selected from the NLM's list of medical subject headings to facilitate the use of the retrieval system for those who are interested in doing more extensive research. LITERATURE SEARCH NO. 73-17

NATIONAL LIBRARY OF MEDICINE

SUDDEN UNEXPECTED DEATH IN INFANTS

Supplement to Literature Search No. 71-14

April 1971 through June 1973. 108 Citations

Prepared by Jacqueline van de Kamp

NLM Literature Searches are selected computer-generated bibliographies produced by the Library's Medical Literature Analysis and Retrieval System (MEDLARS). Selection is made on the basis of significant current interest of the subject matter to a substantial audience. For this purpose a MEDLARS search which originally may have been generated for an individual is formulated, photocomposed, and printed for dissemination to other interested health professionals.

Each Literature Search has been given a short descriptive title with a qualifying subtitle indicating the specific point of view of the search. These selected searches are judged to contain a major portion of the relevant citations appearing in *Index Medicus* between the dates shown with the title of the search. Some non-relevant citations may appear and some relevant ones may be absent, but this is to be expected for machine-generated searches.

Each citation is listed together with the descriptors selected from the National Library of Medicine's list of medical subject headings (MeSH) under which the article was indexed. Subject headings of major importance in an article are identified with an asterisk, and the article cited will be found in *Index Medicus* under those headings. *Index Medicus* may be searched under those headings for additional or related citations.

New NLM Literature Searches are announced through monthly notices in *Index Medicus*, *Monthly Bibliography of Medical Reviews*, *Journal of the American Medical Association (Book Forum)*, *Drug Research Reports*, *Journal of the American Dental Association*, and *Public Health Reports*. For a complete list of Literature Search titles write: Literature Search Program, Reference Section, Reference Services Division, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20014.
